

ATLANTIC PARK

# CONTEXT & LOCATION

Atlantic Park is situated within the City's approved West Coast Development Corridor. It is located close to the intersection of the N7 National Road and the M12 (Potsdam) interchange with the latter road being the major north-south arterial linking neighbourhoods on both sides of the N7.

This prime development overlooking the vineyards of Durbanville will be a neat upmarket industrial park, earmarked for strategic long term leases and the creation of investment grade assets.

Atlantic Park is zoned for industrial uses with high end logistics facilities either completed or being constructed at this moment on land parcels within the Park.

Its central location to national roads such as the N7 and N1 and connectivity to express distribution roads such as the M12 and Koeberg Roads as well as the Cape Town Port only being +/- 20kms away make Atlantic Park the ideal position for warehousing and distribution type facilities.
